Subject: WAIS Workshop Proceedings & AV
z

From: George Brett <ghb@concert.net>
Date: Thu, 9 Jan 92 6:53:06 EST

We are going to have a 'proceedings' from the workshop. It will be handed out during registration at the meeting. I need from you all what ever materials you would like to have included. Preferably you would send a copy of viewfoils, outline, or other brief synopsis of what you'll cover in your presentation.

Brewster, we are planning on up to a 100 page document.... I think we could include some of the WAIS info that you have shared with us in the past. Would you think about which piece(s) you would want in there and let me know. If space constrains us we may not use all you send. But, we can have materials on hand at the meeting... they would not be bound into the document.

Great. I suggest two newer documents that people might not have seen, and give a good overview:

- "An Executive Information System for Unstructured Files: Wide Area Information Servers", Brewster Kahle, Harry Morris, Franklin Davis, Kevin Teine, Clare Hart, Robin Palmer. August, 1991. Description of the Peat Marwick experiment, similar to the paper in Online above.

- "Interfaces for Wide Area Information Servers", Brewster Kahle, Harry Morris, Jonathan Goldman (Thinking Machines Corporation), Thomas Erickson (Apple Computer), John Curran (NSF Network Service Center), January 1992. Available via anonymous ftp:
`/proj/wais/ftp/pub/wais/wais-discussion/wais-interfaces-0.*.sit.hqx` and
`/proj/wais/ftp/pub/wais/wais-discussion/wais-interfaces-0.*.ps`
or WAIS server wais-discussion-archives.src

Cliff, do you have a good and 'brief' bit on Z39.50 that we could roll in additional to your outline/foils? I think that would be a useful addition.

Also, folks if you have AV needs please let me know. I am working on getting direct IP access to the auditorium with a Macintosh and perhaps PS-2 for presentation purposes. Any thing else please let me know.

I suggest a VCR and TV for a video if it is easy. There is the CNN video on WAIS and a 2 minute demo which comes across well.

The deadline for the proceedings is: January 20. Send me email if you like and I'll print it out here... Postscript files are acceptable too.

I think it might be easier to just send you the papers.

this is looking better every day!
-- george

thank you.
